

Thinking about hazards and local routines

Choose a city or an area that might be exposed to potential hazards. Here are some examples, but you could choose any number of others.

- Rural area in Indonesia (Eruption)
- Pompeii on the Bay of Naples (Impending eruption/pyroclastic flow)
- Philippines (Tsunami from Japanese earthquake)

Name of hazardous event:

What complications to rescue could be encountered if a tectonic event occurred during these four times? How would these make casualties worse?

	Very early morning	Morning peak hour	Office hours	Late evening
Roads				
Homes				

Variations in routine caused by seasonal variation ie summer/winter monsoon etc.
