

# Reversing the trend

You are a Polish migrant worker in the UK who is thinking about going home. Below is a set of reasons why you might be considering this move. Put them into your diamond 9 formation in order of how important you think they are to your move.

Unemployment levels in Poland have decreased greatly

The value of the pound has almost halved recently

I miss Polish culture and food

Polish wages are increasing by 12.8% each year

Crime levels in the UK scare me

We're well educated but the jobs we do here are low-skilled

There are many construction jobs in Poland for the football European Championships in 2012

I miss my home and family

I don't want to be reliant on UK benefits
